Attached is a redraft of function statement for OTS. I discussed this with [redacted] yesterday, and he asked me to insert two items. In the fifth line of paragraph 2 the words "in any field" have been added. Also the last sentence of paragraph 2 has been added. I have no objection to the former and believe the second addition to be desirable. It is now satisfactory to [redacted] and if you have no objection I believe it is ready for publication. [redacted] requested that we return the attached file to him.
